

# RPB® Product Update

**We error proofed the NV2021B breathing tube with two different ends, so it can no longer be screwed onto the helmet the wrong way. Protecting our clients safety!**

**Due to valued feedback from our blast distributors internationally, the update to the breathing tube has been requested to:**

- **Standardize our breathing tubes to one tube for all blast helmets.** This means you only need to stock one breathing tube ongoing, reducing your product inventory/spare parts.
- **Stop customers/end users connecting the NV2021 breathing tube the wrong way (back to front on the helmet), and breaking them.** If the current NV2021 is put on back to front, it will result in failure. With the new NV2021B breathing tube, it can only be put on one way (it is impossible to put on wrong).

**Questions? Unsure on the changes or how they will affect you?**

Call 1-866-494-4599, email [info@rpbsafety.com](mailto:info@rpbsafety.com) or visit [rpbsafety.com](http://rpbsafety.com)

## Current parts:

Current air inlet fitting on T-Link and Z-Link

04-835 PAPR Breathing tube for T-Link and Z-Link (current)

04-830 SAR Breathing tube for T-Link and Z-Link (current)

## New parts:

16-519 New air inlet fitting on T-Link and Z-Link

04-837A PAPR breathing tube and new air inlet fitting package for T-Link and Z-Link

04-833A SAR breathing tube and new air inlet fitting package for T-Link and Z-Link

16-519 New air inlet fitting for T-Link and Z-Link (isolated)

Protecting you for life's best moments.

# RPB Astro™

## Changes include:

- Astro helmet now has a gray inlet.
- Astro breathing tube now has a green threaded insert.

## Current parts:

**NV2006/7** Current air inlet fitting on Astro

**NV2021** Breathing tube for Astro (current)

## New parts:

**03-035** New air inlet fitting on Astro

**NV2021A** New air inlet fitting and breathing tube package for Astro

**03-035** New air inlet fitting for Astro (isolated)

*Protecting you for life's best moments.*

# RPB PX5® PAPR

## New product:

- The 04-831 PX5 breathing tube requires the 16-519 new air inlet assembly to be compatible with the T-Link and Z-Link.
- The breathing tube has a female threaded end.

## New parts:

**New air inlet fitting  
on T-Link and Z-Link**

**04-831** PX5 PAPR  
Breathing Tube

**16-519** New air inlet fitting for  
T-Link and Z-Link (isolated)

*Protecting you for life's best moments.*
