

BULK AMPHIBLAST

DESCRIPTION

The Schmidt AmphiBlast™ takes bulk pot engineering to a whole new level!

What has changed from previous generations of Schmidt bulk pots? The main difference - versatility.

The following 4 functions can be chosen by the flip of a switch:

- Dry Blast - this machine is not limited to specialized wet blast functionality - use it for ALL your projects - dry or wet.
- Wet Blast - when the occasion calls for it, flip the switch to inject water into the blast stream.
- Soft Wash - washing the surface after wet blasting is as easy as flipping a switch.
- Blow Down - blowing off is easily accomplished. No valve closing required!

What has NOT changed from previous generations?

The rugged reliability for which Schmidt is renowned. Need we say more?

PART #/SPECIFICATIONS

Vary dependent upon purchase/rental configurations

The Schmidt AmphiBlast is available for Rental or Purchase

Bulk bag rack is available for easier refilling of the bulk pot.

Easily change applications in just a few minutes, which allows you to change from dry-blasting to washing without wasting any time.

B3689-2

PURCHASE CONFIGURATIONS

Multiple configurations available - get yours custom made to your specific needs.

Standard Features

- CEN blowdown - Schmidt's unique muffler that won't freeze up
- HALOK closure - Schmidt's safety innovation that prevents lids from blowing off unexpectedly
- Ergo-ladder - provides a robust, built-in solution for accessing lid

Configuration Choices

Mountings:

- Highway trailer
- Yard trailer
- Skid
- Legs (for mounting on customer's equipment)

Sizes:

- 45 cf
- 120 cf
- 160 cf

Valves:

- TeraValve or Thompson Valve II in 2,3, or 4 outlet configurations

Options:

- Integrated aftercooler or dryer - saves time and space
- Bulk bag loading rack - improves safety when loading abrasive
- ShortStop - eliminates possibility of electric short activating the deadman unexpectedly

RENTAL CONFIGURATIONS

- Trailer-mounted, 4-outlet, 120 or 160 cf
