

# Disposable Tank Liners

Easy Clean Up, Reduced Material Usage, Proven Performance

## Economically Optimizes Tank Usage

Semi-rigid pressure tank liners custom made of tough, durable, high density polyethylene, with “anti-static” additive to minimize static electricity build-up in shipping and handling. Ideal for use with all materials compatible with polyethylene.

Available in sizes to fit 2 gallon – 10 gallon tanks.

- Polyethylene construction will not contaminate material
- Allows quicker color changes
- Reduces solvent costs in clean-up
- Time-saving clean-up
- Helps to solve excess material disposal problems

## Tanks + Disposable Liners = Economy

Tanks are an economical means of supplying paint and offer a uniform rate of flow at constant pressure. When combined with disposable tank liners, they are the most economical way to apply paint in most finishing operations.
