## **FLOOR PROTECTION**

Why you need to use AFT's Flame Retardant Surface Protection. Virtually all fire inspectors and insurance under writers require the use of removable coatings and coverings in and around spray booths. With safety and fire regulations increasing each year, why wait for that unannounced safety inspection to get your facility compliant. For a minimal investment you can ensure safety and fire protection of your factory and employees.

### **HIGH STRENGTH FLAME RESISTANT FLOOR PAPER**

AFT's strongest surface protection stands up to the heaviest machinery and foot traffic. Its unique, non-porous design prevents penetration to the substrate beneath. Popular with government and military operations, this exclusive AFT tear-resistant product is highly durable. Available in 36", 48", 60" and 72" inch rolls. Color/White.

### **100# WHITE FLAME RETARDANT FLOOR PAPER**

Our best selling surface protection is as tough as it is popular. The 100# paper weight ensures durability and absorption even under constant operator traffic. It's bright white color promotes booth illumination. The 100# White is conveniently marked with its flame retardant rating for fast easy compliance with inspectors. Available in a wide array of sizes and it works well on all spray booths. Available in 300' rolls 36", 42", 60", 72", and 84" widths.

### **80# FLAME RETARDANT FLOOR PAPER**

AFT's highly efficient, bright white 80# surface protection is ideal for light spray operations. Available in 300' rolls 36", 42", 60", 72", & 84" widths. Can also be used for spray booth wall protection.

### **70# FLAME RETARDANT FLOOR PAPER**

This economical surface protection is white in color, easy to use, and available exclusively from AFT in 300' rolls. Popular in mixing rooms and low-traffic areas, this product offers immediate OSHA compliance at minimal cost. 24-Hour shipping on all sizes. Available in 36", 42", 60", and 72".
